CRM System Demo Video: Review and Summary

Review of *CRM_System (1).mp4*, a screen recording of about 10:36. Based on visual review only (one frame every 15 seconds); audio was not transcribed.

What the video is

A screen-recorded demo of Euro Auto's CRM (looks like SuiteCRM), walking through the car-sales pipeline: lead, convert to opportunity, quotation and financing, documents, Kanban follow-up, bulk import, and booking details.

Parts that look least useful

Time	Why
9:15 – 10:36	Same screen with the Actions menu open, no visible change for over a minute. The clearest cut.
0:15 – 0:45	Two near-identical dashboard frames with no clicks, probably an idle intro.
4:30 – 5:15	Same opportunity page (TEST GCR 9914) in three identical frames, likely a pause or talking.
1:15 – 1:45	Convert Lead form sits unchanged, so probably waiting or typing.
6:15 – 6:45	Import-file page, then a loading screen. Useful the first time, but the waiting isn't.
5:45 and 8:00	The Filter pop-up is shown twice, so one is a repeat.
2:15 – 2:30 and 8:30 – 9:00	Slow scrolling through long quotation and incentive fields. Skim or speed up.

Together, the first four rows add up to roughly 3 minutes of low-value footage.

Summary: what's worth keeping

1. **0:00 – Login and dashboard:** Sign in, view recent items and the activity stream.

2. **0:45 – Leads:** Open a lead and convert it into an opportunity.
3. **1:45 – Opportunity record:** Currency, sales stage, products, and finance/quotation (vehicle price, fees, promotions, loan details). The sales-stage dropdown is at about 2:45.
4. **3:00 – Documents:** The Actions menu generates documents. A sample receipt from the dealer appears at 3:30.
5. **3:15 and 4:00 – Pipeline views:** List view and Kanban view (Follow Up → Test Drive → Quotation → Follow Up 2).
6. **5:45 – Filtering:** Narrow opportunities by account, amount, stage, or lead source.
7. **6:15 – Import:** Bulk-upload opportunities from a file.
8. **7:30 – Accounts and navigation:** Account record and the "All" menu.
9. **8:15 – Closing details:** Quotation breakdown, incentives, financing, booking details, and the document-generation menu.

Other notes

- **Personal data (7:00 – 7:15):** The Kanban board shows what look like real customer names and contact details. Consider blurring this if the video will be shared.
- **Check audio before cutting:** Several screens (4:30 – 5:15 and 9:15 onward) are probably where the presenter was speaking over a static page.

Suggested next steps

- Trim the video with the dead sections removed (about 7½ minutes would remain).
- Blur or redact customer details around 7:00.
- Share a transcript if the narration needs to be factored into the cuts.
